Unicorn Urban

The Strangford is our flagship range of outdoor litter bins. As standard, the Strangford range offers a range of features to optimise the bin's durability, practicality and attractiveness to the surrounding area. Additionally, a choice of optional extras is also available, enabling customers to customise the bin, further increasing its suitability to any application and environment.

Using advanced engineering processes such as multi stage degreasing and washing, the Strangford range is manufactured from zintec steel resulting in permanence, a high quality finish and supports the environment and related company objectives. For efficient access and servicing, the bin also acquires stainless steel hinges, locks and strike plates.
